

Netti® 4U BASE

- for custom made seats

New

The flexible solution for
custom made seats

ALU REHAB™

Thinking ahead - moving forward

Suitable for moulded seats and other custom made solutions

- Round back pipes for custom made seats
- Back unit suitable for both custom made seats and Netti Seating System
- Solid seat plate

Sitting variation

- Tilt and recline ensures variation for the user during long time seating.
- Provides the necessary rest and relief.
- Forward tilt for activity and easy transfer.

It is in the details

- Ergonomical position of backrest hinge prevents forward sliding when reclining.
- In combination with the foot supports bad sitting position, shear forces and pressure ulcers are prevented.

Intelligent foot supports

- Position of the knee angle is adapted to the biomechanics of the human body.
- The compensating leg length adjustment ensures optimum pressure distribution and stability - in all sitting positions
- The knee can be kept in a 90° angle when the chair is upright
- Unintentional change of position is prevented.

Compact

- The total width of the chair is only 18 cm wider than the seat width.

Seat width	Seat depth	Back height	Seat height	Max load	Weight	Tilt	Back recline	Crash tested
 35-50 cm	 42,5-55 cm (37,5-50 cm)	 50 cm (60 cm)	 46,5-50 cm excl. cushion	 125 kg	 28-29,5 kg excl. cushions	 -8° - +22°	 92° - 137°	 ISO 7176-19

THE FLEXIBLE SOLUTION FOR CUSTOM MADE SEATS

With the introduction of the Netti 4U | BASE it's possible to get the benefits of the Netti wheelchairs when you need a custom made seat solution:

- ✓ Light weight
- ✓ Easy to manoeuvre
- ✓ High degree of flexibility
- ✓ Many adjustment possibilities
- ✓ Large assortment of accessories

Backrest design allows multiple solutions

The Netti 4U | BASE was developed to offer an optimal solution for custom made seats, including moulds. The back pipes are designed to fit for a multiple choice of custom made seats.

Stabilising velcro backrest

The velcro backrest known from our other wheelchairs can also be used on the Netti 4U | BASE, allowing usage of the Netti Seating System.

Ergonomic armrests

The armrests are ergonomically shaped and have several built-in features. When not in use, the armrests can be swung back. By pressing the red button the armrest pads can be pushed forward and backward into the ideal position, whether you are seated in the chair or at a table, or when standing up from the chair.

ALU REHAB™

Thinking ahead - moving forward

ACCESSORIES

As known from our other Netti wheelchairs, Alu Rehab offers a wide range of accessories for Netti 4U | BASE. This makes it possible to fit the wheelchair to the individual user - and not the opposite way around. The accessories from Alu Rehab can be used across most of our Netti wheelchairs making the solution flexible and economic.

Subject to changes and misprints. Version 1 - 2012.
